While the CD30 offers decent functionality, many owners look for upgrades to enhance their in-car audio experience. Several options exist:

- **Connecting to a Bluetooth Adapter:** While the CD30 lacks built-in Bluetooth, many affordable Bluetooth adapters can be purchased and connected via the AUX input, allowing for wireless streaming from smartphones. This is a popular upgrade for modern connectivity.
- **Installing a Different Head Unit:** If you desire a significantly improved system, replacing the CD30 with a modern aftermarket head unit is a viable option, offering features such as touchscreens, advanced connectivity, and better sound quality. However, this requires professional installation. This is a more involved **Opel Astra H CD30 upgrade** but often results in a far superior audio experience.
