While a downloadable PDF might not always be available, they often provide access to online versions of their manuals. Third-party websites also offer copies, but exercise caution and verify their legitimacy.

Q2: My EOS 60D's autofocus is not working properly. What should I do?

A2: First, check the autofocus mode selected (single-point, AI Servo, etc.). Ensure sufficient lighting conditions, as autofocus can struggle in low light. Clean the lens contacts. If the problem persists, a professional camera repair might be necessary.

Q3: How do I shoot video with the Canon EOS 60D?

A3: Switch the mode dial to "Movie" or a similar video mode (the exact wording might vary). Adjust the settings (aperture, shutter speed, etc.) as needed, and press the record button.
