Understanding the Synergy: Financial vs. Managerial Accounting

Before exploring Ivy Software's role, let's briefly differentiate financial and managerial accounting. **Financial accounting** focuses on creating financial statements – balance sheets, income statements, and cash flow statements – for external stakeholders like investors and creditors. These statements adhere to generally accepted accounting principles (GAAP) or International Financial Reporting Standards (IFRS) for standardized reporting. In contrast, **managerial accounting** uses financial and non-financial data internally to help managers make informed decisions. It's less concerned with adhering to strict accounting standards and more focused on providing relevant, timely information for planning, controlling, and decision-making.
