Safe and proper operation of your Mariner M90 is paramount. Before starting the engine, always check the oil level, fuel supply, and the condition of the propeller. Here's a step-by-step guide to getting your engine running smoothly:

- **Pre-Start Checks:** Inspect the engine for any loose components, fuel leaks, or damage. Check the oil level using the dipstick. Ensure sufficient fuel is in the tank. Examine the propeller for any damage or entanglement.
- **Starting the Engine:** Engage the gear shift lever in neutral. Turn the key to the "on" position. Prime the fuel system if necessary (consult your specific model's manual for priming instructions). Engage the starter and allow the engine to reach its idle speed.
- **Operating the Engine:** Once the engine is running smoothly, you can gradually increase the throttle to achieve the desired speed. Remember to always be aware of your surroundings and maintain a safe distance from other vessels and obstacles.
- **Shifting Gears:** Shifting gears should be done smoothly and at lower speeds to avoid damage to the gear system. Always bring the engine back to idle before shifting into neutral or reverse.
- **Safe Shut Down:** Before turning off the engine, allow it to idle for a few minutes to cool down. Then, shift the gear lever into neutral, turn the key to the "off" position, and securely stow any loose items.

Mariner M90 Maintenance: Keeping Your Engine in Top Condition
